Job Title: Fullstack (.Net & ReactJS)

Client: Australia

1. Requirement

We're on the hunt for a hands-on dev with a can-do attitude to help build our SaaS platform. You'll write code, make smart calls, and lead the way as part of a tight, fast-moving team.

- Solid experience (5 yrs+) with solution design, development and maintenance of .Net Core apps & APIs.
- Strong front-end development (3 yrs+) experience with JavaScript frameworks. Preference for [React.js](https://reactjs.org/).
- Experience designing and developing for SQL & NoSQL databases.
- Seasoned understanding of developing and supporting applications for the Cloud. Preference for Azure and SaaS experience.
- Experience performing as part of an offshore software development team.
- Adherence to best practices in coding, security, testing, continuous integration/deployment and automation.
- Familiar with Agile methodologies.
- Excellent communication , collaboration and ownership skills.

Core skills: C#, .Net Core, React.js, Typescript, SQL, NoSQL, design systems, serverless, automated testing.

Advantageous: Bachelor's degree (or similar qualification) in computer science, Information Technology, or related field.
