Title: Senior Fullstack Developer (Java & ReactJS)

Job Description:

We are looking for a **Senior Fullstack Developer (Java & ReactJS)** with solid experience in **Java** and **ReactJS**, and strong communication skills in English to work with our international team. Experience with **PHP/Laravel** is a plus.

Key Responsibilities:

- Develop, test, and maintain high-quality software solutions using **Java** and **React.js**.
- Collaborate with cross-functional teams, including designers, product managers, and other developers, to deliver robust web applications.
- Design and implement scalable backend services and APIs in **Java**.
- Build and enhance interactive front-end features using **React.js**.
- Participate in code reviews, mentoring junior developers, and promoting best practices for software development.
- Troubleshoot and debug application issues, providing timely resolutions.
- Continuously learn and apply new technologies and techniques to improve software development processes.
- Contribute to architectural and design decisions to improve the overall efficiency and scalability of the system.

Requirements:

- 4+ years of professional software development experience.
- Strong proficiency in **Java** for backend development.
- Extensive experience with **React.js** for front-end development.
- Solid understanding of modern software development practices and methodologies.
- Strong problem-solving skills and attention to detail.
- Excellent written and verbal communication skills in **English**.
- Familiarity with databases and RESTful APIs.
- Experience with **Laravel/PHP** is a plus
